Good Morning,

I hope everyone is doing well and had a nice Easter. I certainly did.

EPA is releasing the environmental monitoring plan for Camp Minden and inviting feedback. Here is a copy of the materials and all of them will be posted on the Minden website shortly. We are asking for feedback by April 20. Feedback should be sent to the r6_camp_minden@epa.gov dedicated email box for the project.

Also, EPA is planning some community workshops in Minden in the upcoming weeks. We will send the schedule, time and location shortly.

David

To: Gregory Langley [Gregory.Langley@LA.GOV]
CC: Gray, David [gray.david@epa.gov]
Subject: Clarity still needed on chloroprene emissions guidelines put out by EPA

Gregory

You are saying the .2 guidance is not a recommend standard and that the EPA never gave a suggested recommendation for a standard for emissions of chloroprene?

Why would the EPA give guidance on a rate of emissions if it wasn't recommend that figure as a standard it thinks is safe for humans?

What number does DEQ think is right since .2 has been questioned by Denka and Dr. Brown?

Im cc the EPA in hopes of hearing from the EPA to get its take on the difference between a recommendation and a guidance number - a number (.2) that the EPA stood by even after its findings were challenged by Denka (and Dr. Brown) .

I have moved my deadline until end of day on the 4th to give the EPA time to answer as well.

Regards,
Julie

Subject: Follow up questions Re: Denka

Greg
Gregory,

1. Did you forward me questions to Chuck Carr Brown? I want to confirm he got them.

I discussed your questions with Dr. Brown.

.

2. EPA suggested a standard right? .02

EPA has not suggested a standard. Former acting Region 6 Administrator Sam Coleman called .2 a "guidance."

Perhaps I used the wrong word — since to me, recommended and suggested are one and the same when a number is suggested by a regulator .

3. Please explain why DEQ dismisses the .02 suggestion so readily.
EPA has stood by its **suggested** standard.

We have not said that should not be the standard. We have not said it should be the standard. We said there is no federal standard now for chloroprene. LDEQ is working with EPA to gather actual monitoring data. The guidance is derived from the National Air Toxics Assessment. NATA uses estimates of emissions and computer models to approximate risks; it is not designed to determine actual health risks to individual people. .2 micrograms per cubic meter is not a federally enforceable emissions limit. Should EPA set a standard for chloroprene, LDEQ will enforce that standard.

4. Though the emissions went down, they are not close to the suggested standard. Since DEQ doesn't agree with the EPA - What is the DEQ's suggested limit and where is the science the DEQ is using to make its judgment call on coming from - the EPA or Denka?

LDEQ is committed to achieving the lowest possible level of emissions.

Regards,

Julie

Subject: Denka Dupont- report for Monday

My dead line for this is noon on April 2

Since the EPA stood by it's finding about its recommend standard for emission for chloroprene.

Is the DEQ going to take any action to protect the community from the chloroprene emissions that the plant is still putting out that exceed EPA's recommend standard?

EPA has not recommended a standard. EPA has offered guidance toward developing a standard. We will continue to monitor and assess the impact of the recently installed emissions control equipment at Denka Performance Elastomers. The latest data -- collected after the installation of the RTO -- show emissions levels are decreasing. LDEQ will continue to work with LDH and EPA to collect and review information about emissions, exposure and risk to the health of those who live, work and go to school in the area.

Please ask Dr. Chuck Carr Brown what he would say to the people in Reserve and LaPlace that believe they are being treated like human guinea pigs.

And does Dr. Chuck Carr Brown still think it is safe for children to go to school in the area near the plant?

Also - Do you want to revise any of the statements you have previously sent me about the Denka plant?

Regards,

Julie

2-18-16 Meeting
Agenda.pdf

Call-in number: 866-299-3188

Code: Ex. 6 Personal Privacy (PP)

Denka has requested an 'introductory' meeting with R6. Denka's attendees will be Jorge Lavastida, Executive Officer and Plant Manager, and Bob Holden, Attorney, Liskow & Lewis. DuPont has asked to join the meeting. DuPont's attendees are TBD. Invited from LDEQ are Celena Cage and Tegan Treadway.

Background: 6EN issued a CAA 114 Information Request on December 18, 2015, relating primarily to chloroprene emissions at Denka's synthetic rubber manufacturing facility at the Pontchartrain Works Site in Laplace, Louisiana. 6EN is in the process of reviewing Denka's response, which was received January 25. Denka purchased the facility from DuPont on November 1, 2015. (Dupont was also issued a 114 request; its response is due February 12).

Ted – I ‘accepted all’ changes – see attached file “Govt mark up 12.22.16 LDEQ edits v2”).

I also attached a yesterday’s version, but with comments removed and your monitoring language added (“Govt mark up 12.23.16”)

It might be a good idea to share both versions with Bob – the accepted all version and the one with all of our redlines / strikeouts clearly showing (Govt mark up 12.23.16), so Bob can better follow our changes.

Thanks,
Justin
